Our Vision

To be the leading infocomm technology solutions provider to meet the demands and dynamism of today's business environment.

Our Mission

To offer effective solutions and services to enhance our customers' competitiveness and to meet their business objectives.

1-NET: THE INTEGRATED INFOCOMM TECHNOLOGY SOLUTIONS PROVIDER

With the phenomenal increase in the use of IT, telecommunication and the Internet, putting it all together to deliver seamless solutions that work has become a priority. 1-Net is a leading infocomm technology solutions provider that offers integrated solutions and expertise under one roof to meet the challenges of the fast changing business environment in this e-age.

As the operator of the nation's broadband network, SingaporeONE, 1-Net is recognised as a pioneer in the development of broadband in Singapore. Today, 1-Net continues to push forward the frontiers of broadband technology relentlessly. Setting the bar, 1-Net currently operates the nationwide core network of Asynchronous Transfer Mode (ATM) switches to facilitate the delivery of broadband multimedia services.

In keeping with its drive towards total integration, 1-Net also manages telco-class Internet Data Centres, provides domestic and international connectivity, professional services, managed services and media delivery solutions.

SOLUTIONS EVERYDAY, IN EVERY WAY.

1-Net's dedication to a holistic approach to infocomm technology is reflected in its various offerings. Today's corporate users often demand solutions that are tailored to answer to their specific situations and needs. 1-Net is uniquely equipped to deliver infocomm solutions in integrated packages that perform optimally for each unique customer.

Hosting

- Co-location services & private suites
- Telco-class facility management

Media Delivery

- Live streaming
- Video-on-demand

OUR VALUE PROPOSITION

Making sure that our clients receive value above and beyond the expected, 1-Net developed a whole set of core strengths to maximise skills and knowledge for outstanding results:

Bandwidth on Demand

Our SingaporeONE infrastructure leverages on the leading edge ATM (Asynchronous Transfer Mode) technology for the fastest and most cost effective local connectivity in Singapore.

High Network Availability

Our high QOS (quality of service) of >99.7% exceeds IDA's QOS requirement of 99.5%.

Multiple Upstream Providers

Our connection to multiple upstream providers enables us to offer multi-homed bandwidth for high availability and cable redundancy.

Flexibility

Our scalable range of solutions can be customised to fit your requirements perfectly. This includes flexible bandwidth configuration that separates your domestic and international traffic, allowing you to manage your bandwidth utilisation more cost effectively.

24 by 7 Network Monitoring

Our state-of-the-art Network Operations Centre proactively monitors your network 24 hours a day, 7 days a week.

Domain name registration and IP addresses

We are able to host primary and secondary DNS, regardless of the number of domains. Our own IP subnets enable us to assign IP addresses for our customer's Internet access.

Qualified IT Professionals

Our core competency in network and IT skills is supported by a team of highly qualified and dedicated IT professionals.

Telco-class Data Centres

Our data centers offer state-of-the-art environment designed specifically for server co-location.

TruSecure Certification

This certification awarded to our data centre reflects our compliance with an extensive and continuous security assurance process and validates the presence of risk reduction practices.
